

Caroline's Comets

By Emily Arnold McCully

HAVE
FUN!

Discuss

Talk through your thoughts.

- This book is about the first woman to discover a comet and to be paid for scientific research. Talk about why it is important to learn about women past and present.
- Just like William and Caroline wondered about Earth's solar system, what do you wonder about this world?

Create

Make an experience of your own.

- With permission, look online and find a way to make your own telescope. Create your own map of the sky. Find other books about astronomers. Read more in the back of this book under the "Timeline."

Imagine

Use your imagination to explore.

- Learn more about recent discoveries in space.
- Imagine you discovered a new planet. Write a journal entry about what you discovered, and information you would want others to know and remember.
